

Peet gets active to reduce, reuse and recycle

Hundreds of Peet Limited team members joined thousands of other Australians across the country in supporting National Recycling Week 2010 by enthusiastically participating in the 'Friday File Fling' on 12 November 2010.

Across the country in the Perth, Melbourne and Brisbane offices the team filled more than 10 extra large recycling bins!

The bins were filled with paper, magazines, newspapers and more while other recyclables including mobile phones, CDs, soft drink cans and bottles were also collected.

Peet is encouraging residents and purchasers at all its communities to take up the challenge and actively recycle at home. To help them get started, Peet has provided information on recycling on its community websites and through community newsletters.

As a further incentive, if residents make a recycling pledge or share what they already do to recycle at home or in your community, residents and purchasers will have the chance to win a weekend away for two at an eco resort*.

To enter, residents can email their response, along with their name, address, telephone number and the Peet community in which they live or are building, to community@peet.com.au. The competition closes on 21 November 2010.

For more information about recycling please visit www.recyclingweek.planetark.org or for more information about Peet Limited and its communities across Australia please visit www.peet.com.au.
